

Summarize what matters

Name: _____

Date: _____

A student team noticed that children often waited at a local laundromat with little to do. With the owner's permission, they set up a small holder of free practice sheets and a cup of pencils. They checked the station and replaced supplies as needed. Families began choosing sheets during the wash cycle. The team asked the owner for feedback and moved the holder to a clearer spot. They learned that a useful idea also needs care and attention.

1. What need did the team notice?

2. What did they do to address it?

3. How did they improve the station?

4. Write a two-sentence summary of the important events.

☐ I tried it.

☐ I checked it.

☐ I want another sheet.

Grown-up check (similar wording is fine): 1) children had little to do while waiting | 2) set up free sheets and pencils | 3) asked for feedback and moved holder | 4) team created and maintained a learning station, then improved its placement
